

# Subject Index to Volume 31

## A

- Acetylcholine**  
dimaprit-evoked colonic release, G465
- Actin**  
in pancreatic acinar cells, effects of supramaximal secretagogue stimulation, G328
- Actin filaments**  
disassembly by *Clostridium difficile* toxin B, role of calcium influx, G487
- Adenosine 3',5'-cyclic monophosphate**  
hepatocellular synthesis, mechanism of bile acid suppression, G300  
hormone-induced production in non-liver cells, bile acid effects on, G908  
levels in colonic crypt cells, effects of PGE<sub>2</sub>, G270  
role in secretagogue stimulation of parietal cell aminopyrine accumulation, G82
- Adenosine 5'-cyclic diphosphate-ribose**  
non-role in ryanodine-induced Ca<sup>2+</sup> release from hepatocyte microsomes, G1017
- Adenosine 5'-triphosphate**  
pancreatic decrease, role in pancreatitis pathophysiology, G592  
role in bile acid transport across trophoblast from fetus to maternal blood, G685
- Adenosine 5'-triphosphate diphosphohydrolases, see Ecto-ATPases**
- Adenovirus**  
as vector for gene transfer to salivary submandibular gland, G1074
- Adenylyl cyclase**  
role in portal vein stenosis effects on cardiac  $\beta$ -adrenoceptors, G410
- $\alpha$ -Adrenergic pathways**  
role in gastric slow wave dysrhythmias of motion sickness, G539
- $\beta$ -Adrenergic receptors**  
cardiac, effects of portal vein stenosis on, G410  
hepatic, downregulation after hemorrhagic shock, G749
- Adrenocorticotrophic hormone**  
interleukin-1-induced, effects of cholestasis and role of impaired hypothalamic PGE<sub>2</sub> release, G404
- Aging**  
effects on esophageal secondary peristalsis and sphincter pressures, G772  
effects on oral-pharyngeal and upper esophageal sphincter function during swallowing, G389
- Alanine**  
jejunal absorption, effects of vagal capsaicin-sensitive primary afferent fibers, G695
- Albumin**  
serum, galactosylated, recognition by liver, G849
- Allopurinol**  
and effects of hepatic hypoxia on *E. coli*-induced TNF- $\alpha$  expression, G311

## Amidation

- role in bile acid effects on DNA synthesis in regenerating liver, G1051

- $\gamma$ -Aminobutyric acid<sub>A</sub> receptors**  
in hypothalamic dorsomedial nucleus, blockade-induced intestinal motility, G514

- Aminopyrine**  
accumulation in parietal cells, role of cAMP in gastrin and carbachol actions, G82

- Amylase**  
pancreatic, nerve-mediated secretion, presynaptic inhibition by serotonin, G339

- Anaphylaxis**  
intestinal, food protein-induced, effects on colon longitudinal muscle contractility, G764

- Angiogenesis**  
gastric, from basic fibroblast growth factor, timing of ulcer healing effects, G276

- Anion secretion**  
colonic, histamine H<sub>2</sub> receptor-induced, role of VIP-ergic and cholinergic pathways, G465

- Antropyloroduodenal motility**  
after ingestion of nonnutrient liquid, effects of posture and gravity, G868

- Apoptosis**  
of hepatocytes, bile acid-induced, role of serine protease translocation to nucleus, G613

- Apyrases, see Ecto-ATPases**

- Arginine**  
transport by system y<sup>+</sup>, regulation in differentiating Caco-2 cells, G578

- L-Arginine**  
effects on endotoxin-induced hepatic vascular hyporeactivity to phenylephrine, G177  
effects on nitric oxide suppression of hepatocyte urea production, G183

- Arrhythmias**  
of gastric slow wave, from motion sickness, role of cholinergic and  $\alpha$ -adrenergic pathways, G539

- Arterioles**  
gastric submucosal, sensory neuron-induced vasodilation, roles of NO and calcitonin gene-related peptide, G791

- Asialoglycoprotein receptor**  
role in hepatic recognition of galactosylated proteins, G849

- Aspirin**  
chronic doses, gastric mucosal adaptation to, G134

- Atherosclerosis**  
kinetics and uptake of oxidized chylomicrons, G709

- Atropine**  
effects on carbachol-induced pancreatic goblet cell degranulation, G24  
effects on veratridine-evoked pancreatic amylase secretion and c-fos expression, G339  
effects on volume and rhythm of pancreatic enzyme secretions, G251

## B

- Bacteremia**  
gram-negative, hepatic TNF- $\alpha$  expression from, effects of hypoxia-reoxygenation, G311

- Barrier function**  
in distal colon, time course of disruption and recovery during colitis, G622  
of tight junctions, intestinal, enteropathogenic *E. coli* effects on, G374

- Basic amino acid transporter, mouse**  
and system y<sup>+</sup> transport of arginine by Caco-2 cells, changes with differentiation, G578

- Basic fibroblast growth factor**  
effects on indomethacin-delayed gastric ulcer healing, G276

- Belching**  
nasopharyngeal closure, mechanism and timing, G1037

- Bicarbonate ion secretion**  
jejunal, in CF vs. normal mice, G505  
serosal, mechanisms of gastric protection, G496

- Bile**  
excretion of hepatic lysosomal organic cations, G480

- Bile acids**  
effects on DNA synthesis in regenerating liver, G1051

- effects on hormone-induced cAMP production in non-liver cells, G908  
facilitation of protoporphyrin excretion, G754

- hepatic organic anion uptake systems basolateral dicarboxylate/cholate antiporter system, G797  
in skate, G18

- hepatocyte apoptosis from, role of serine protease translocation to nucleus, G613

- suppression of hepatocellular cAMP synthesis, role of PKC, G300

- transport  
sodium-taurocholate cotransport in hepatocyte, effects of prolactin, G11  
across trophoblast from fetus to maternal blood, G685

- Bile ducts**  
resection, cholestasis from, hepatic opioid mRNA expression, G346

- Bile salts**  
lovastatin effects on hepatic metabolism in rat, G242

- Blood flow**  
in gastric ulcer margin, tobacco vs. non-tobacco smoke effects on, G153

- Blood pressure**  
effects of GABA<sub>A</sub> receptor blockade in hypothalamic dorsomedial nucleus, G514

- Blood substitutes**  
human recombinant hemoglobin, chest pain from, possible role of nitric oxide scavengers, G443

- Bombesin**  
effects on pancreatic goblet cell degranulation, G24  
gastric acid secretion from, inhibition by gastrin monoclonal antibody, G54

**Bombesin receptors**

in regulation of pancreatic goblet cell degranulation, G24

**Brain**

brain stem nuclei, peptide YY injection, induction of vagal stimulation of gastric acid secretion, G943  
dorsal motor nucleus of vagus effects of serotonin alone and with thyrotropin-releasing hormone, G292  
integration of vagal and spinal input from GI tract, G780  
and peptide YY effects on gastric acid secretion, G943  
thyrotropin-releasing hormone in, role in kainic acid gastroprotection, G548  
dorsal vagal complex, role in control of digestion (review), G1  
hypothalamic dorsomedial nucleus, GABA<sub>A</sub> receptor blockade, intestinal motility from, G514  
nucleus tractus solitarius and integration of visceral input in dorsal motor nucleus of vagus, G780  
role in vagovagal reflex control of digestion, G1  
raphe nuclei, role in vagovagal reflex control of digestion (review), G1  
raphe pallidus, kainic acid excitation, gastroprotective effect, role of medullary thyrotropin-releasing hormone, G548

**5-Bromo-2'-deoxyuridine**

effects on normal vs. glucocorticoid-accelerated intestinal maturation, G139

**Bromosulphophthalein**

chloride-dependent hepatic uptake in skate, G18  
hepatic uptake, oxidase-induced changes, G47

**Buffers**

interstitial, role in gastric mucosal oxyntic cell pH<sub>i</sub>, G496

**C****Caerulein**

effects of supramaximal doses on pancreatic acinar cell cytoskeleton, G328

**Calcitonin gene-related peptide**

interaction with NO in sensory neuron-induced gastric vasodilation, G791

**Calcium channels**

role in phenylalanine-induced intestinal cholecystokinin secretion, G90

**Calcium ion**

cytosolic  
role in phenylalanine-induced intestinal cholecystokinin secretion, G90  
role in secretagogue stimulation of parietal cell aminopyrine accumulation, G82  
effects on cGMP formation in pancreatic acinar cells, G900  
influx, role in actin filament disassembly by *Clostridium difficile* toxin B, G487  
intracellular  
in gastric chief cells, mobilization by nonsteroidal anti-inflammatory drugs, G968

and gastrin-cholecystokinin-B receptors on J.RT3-T3.5 Jurkat cells, G522

intestinal, and *E. coli* effects on intestinal tight junction barrier function, G374

ryanodine-induced release from hepatic microsomes and permeabilized hepatocytes, G1017

**Calcium signaling**

role in actin filament disassembly by *Clostridium difficile* toxin B, G487

**Canalicular multispecific organic anion transporter**

and bile acid facilitation of protoporphyrin excretion, G754

**Capsaicin**

effects on enterogastric inhibition of gastric acid secretion, G286  
gastric fluid increase from, role in adaptive cytoprotection, G200

**Capsaicin-sensitive primary afferent fibers**

role in regulation of jejunal alanine absorption, G695

**Capsaicin-sensitive sensory nerves**

gastric vasodilation from, interactions of NO and calcitonin gene-related peptide, G791

**Carbachol**

effects on pancreatic goblet cell degranulation, G24  
need for cAMP in eliciting parietal cell aminopyrine accumulation, G82

**Carbohydrate**

dietary, effects on jejunal lactase gene expression, G1066

**Carbon dioxide-bicarbonate**

interstitial, role in gastric mucosal oxyntic cell pH<sub>i</sub>, G496

**mCAT-1**

and system y<sup>+</sup> transport of arginine by Caco-2 cells, changes with differentiation, G578

**Catalase**

effects on oxidase-induced hepatic microcirculatory changes, G47

**Catecholamines**

production and metabolism in liver, mesenteric organs, and kidney, G641

**Cathepsin L**

role in intrinsic factor degradation, G33

**Cationic amino acid transporter, mouse**

and system y<sup>+</sup> transport of arginine by Caco-2 cells, changes with differentiation, G578

**Cell death, see Apoptosis****Cell differentiation**

enterocytic, role of laminin and merosin, G857

in intestinal epithelium, use of *Moluccella laevis* lectin as marker, G553

**Cell renewal**

small intestine crypt-villus axis organization and stem cell hierarchy during development in mouse, G813

**Central nervous system**

vagal activation by thyrotropin-releasing hormone analogue, effects on gastric NO, G895

**Chenodeoxycholic acid**

effects on hepatocellular cAMP formation, G300

**Chloride currents**

forskolin- and norepinephrine-activated, in mouse mandibular salivary duct, G806

**Chloride ion**

cAMP-mediated secretion, jejunal, in CF vs. normal mice, G505  
distension-induced intestinal secretion, vasoactive intestinal peptide as neurotransmitter, G725  
transport in distal colon, time course of disruption and recovery during colitis, G622

**Chloride secretion**

colonic, histamine H<sub>2</sub> receptor-induced, role of VIP-ergic and cholinergic neurons, G465

**Cholate**

hepatic uptake, basolateral dicarboxylate/cholate antiport system, G797

**Cholecystokinin**

effects on pancreatic goblet cell degranulation, G24  
effects on vagal gastric mechanoreceptors, G355  
gastrin-cholecystokinin-B receptors on J.RT3-T3.5 Jurkat cells, G522  
in pancreatic acini, activation of mitogen-activated protein kinase, G1060  
phenylalanine-induced intestinal secretion, role of calcium, G90  
role in volume and rhythm of pancreatic enzyme secretions, G251

**Cholecystokinin receptors**

subtypes on guinea pig chief cells, G605

**Cholestasis**

bile acid-induced hepatocyte apoptosis in, role of serine protease translocation to nucleus, G613  
effects on IL-1-induced ACTH release, role of impaired hypothalamic PGE<sub>2</sub> release, G404  
hepatic opioid mRNA expression during, G346

**Cholesterol**

intestinal absorption and lymphatic transport, effect of ingested structured triglycerides on, G568  
lovastatin effects on hepatic metabolism in rat, G242

**Cholinergic mechanisms**

role in volume and rhythm of pancreatic enzyme secretions, G251

**Cholinergic pathways**

central, role in gastric slow wave dysrhythmias of motion sickness, G539  
role in histamine H<sub>2</sub> receptor-induced colonic secretion, G465

**Chylomicrons**

oxidative modification, effects on rate and site of clearance, G709

**Chyme**

duodenal transport patterns during fasting and postprandial states, G700  
effects on proximal colonic tone, G95

**Cigarette smoke**

tobacco vs. non-tobacco, effects on gastric ulcer margin hyperemia, G153

**Circadian rhythm**

of pancreatic exocrine secretions, regulatory mechanisms, G251

**Circular vection**

gastric slow wave dysrhythmia from, role of cholinergic and  $\alpha$ -adrenergic pathways, G539

**Cirrhosis, hepatic**

from chronic iron overload, and iron-induced lipocyte activation, G451  
endothelium-dependent vasodilation in, G459

**cis-Parinaric acid**

peroxidation of, differential sensitivity of membrane inner and outer leaflets, G260

***Clostridium difficile* toxin B**

actin filament disassembly by, role of calcium influx, G487

**Cobalamin**

ileal absorption, and intrinsic factor degradation by cathepsin L, G33

**Colitis**

benefits of nitric oxide inhibition, G673  
time course of changes in electrolyte transport and inflammation indexes, G622

**Collagen**

production in lipocytes, from chronic iron overload, and iron overload-induced hepatic fibrosis, G451

**Colon**

contractile patterns, relation to colonic propulsion, G530  
contractility of longitudinal muscle, effects of food protein-induced GI allergy, G764  
crypt cells, prostaglandin E<sub>2</sub> receptors, properties, G270  
histamine H<sub>2</sub> receptor-induced secretions, role of VIP-ergic and cholinergic pathways, G465  
motility, induced by GABA<sub>A</sub> receptor blockade in hypothalamic dorsomedial nucleus, G514  
in unrestrained ambulatory dogs, 24-hour study, G650  
peptide YY, trophic actions and ontogeny of gene expression, G71  
proximal, tonic responses to eating, nutrients, and simulated diarrhea, G95  
uptake and interconversion of plasma n-3 polyunsaturated fatty acids, G732

**Crohn's disease, see Colitis****Cycloheximide**

effects on prolactin-mediated sodium-taurocholate, cotransport in hepatocyte, G11

**Cyclooxygenase**

and effects of hepatic hypoxia on *E. coli*-induced TNF- $\alpha$  expression, G311

**Cystic fibrosis**

gastric emptying of oil and aqueous meal components, effects of posture, G925  
gastrointestinal ion transport defects, G505  
increased expression of sulfated glycoprotein gp300 and acinar pathology in CFTR(-/-) mice, G717

**Cystic fibrosis transmembrane conductance regulator**

possible presence in mouse mandibular salivary duct, G806

**Cytoskeleton**

in pancreatic acinar cells, effects of supramaximal secretagogue stimulation, G328

**Cytotoxins**

*Clostridium difficile* toxin B, actin filament disassembly by, role of calcium influx, G487

**D****Defecation**

patterns in unrestrained ambulatory dogs, 24-hour study, G650

**Deglutition**

oropharyngeal, in cat, videofluoroscopy and electromyography, G232

**Desensitization**

phosphoinositide synthesis in desensitized pancreatic acinar cells, G1043

**Development, see Maturation****Dextran sulfate**

effect on hepatocyte growth factor/scatter factor plasma levels, G380

**Diaphragm**

mechanics of phrenic ampullary emptying, G320

**Diarrhea**

changes in distal colonic electrolyte transport and inflammation indexes during colitis, G622  
enteropathogenic *E. coli* effects on intestinal tight junction barrier function, G374  
food protein-induced GI allergy, effects on colon longitudinal muscle contractility, G764  
simulated, effects on proximal colonic tone, G95

**Dicarboxylate/cholate antiport system**

basolateral, in hepatocytes, G797

**Dietary components**

carbohydrate or fat, effects on jejunal lactase gene expression, G1066  
oil, from corn, linseed, or fish, effects on clearance of oxidatively modified chylomicrons, G709

**Dietary deficiencies**

phosphates, adaptation of Na<sup>+</sup>-P<sub>i</sub> transporter, effects of hypophosphatemia, G917

**Digestion**

vagovagal reflex control (review), G1

**Digestive enzymes**

pancreatic and effects of supramaximal secretagogue stimulation on acinar cell cytoskeleton, G328  
periodicity of secretions, regulatory mechanisms, G251

**Diltiazem**

effects on phenylalanine-induced intestinal cholecystokinin secretion, G90

**Dimaprit**

colonic short-circuit current increases from, role of VIP-ergic and cholinergic neurons, G465

**DNA**

see also **Gene transfer**  
synthesis in regenerating liver effects of bile acids and role of amidation, G1051  
role of salivary glands, G872

**Dopamine**

production and metabolism in liver, mesenteric organs, and kidney, G641

**Drugs**

hepatic lysosomal transport of organic cations, G480

**Duodenum**

motor activity, relation to surface electrogastrography, G424  
peptide YY trophic actions, G71  
pH, effects on interdigestive migrating myoelectric complex, G146

**E****Ecto-ATPases**

in small intestine brush-border membranes, G663

**Eicosanoids**

precursors from GI uptake and interconversion of plasma n-3 polyunsaturated fatty acids, G732

**Elastase**

activation in pancreatitis, role of ATP and glutathione decrease, G592

**Electrolyte transport**

in distal colon, time course of disruption and recovery during colitis, G622

**Endoneurocrine factors**

role in vagovagal reflex control of digestion (review), G1

**Endopeptidases**

cathepsin L, role in intrinsic factor degradation, G33

**Endothelial cells**

of umbilical vein, hormone-induced cAMP production, bile acid effects on, G908

**Endothelins**

ET-1, role in liver injury from galactosamine and endotoxin, G997

**Endothelium-dependent vasodilation**

in hepatic cirrhosis, G459

**Endotoxin**

hepatic vascular hyporeactivity from, role of nitric oxide, G177  
liver injury from, role of endothelin-1, G997

**Enteric nervous system**

inflammatory changes in smooth muscle regulation, G823  
influence on jejunal chloride secretion in normal and cystic fibrosis mice, G505  
vagovagal reflex control of digestion (review), G1

**Enterocytes**

cell differentiation studies, use of *Moluccella laevis* lectin as marker, G553  
differentiation, role of laminin and merosin, G857  
glucose transport in brush-border membrane vesicles, polyamine effects on, G416  
ischemic effects on cellular and mitochondrial respiration, G116  
respiration rates after graded ischemia, G116

**Epidermal growth factor**

from salivary glands, role in liver regeneration, G872

**Epithelial cells**

- of colonic crypt, prostaglandin E<sub>2</sub> receptors, properties, G270
- of gastric mucosa, restitution after injury, role of NO, G933
- gastrointestinal
  - differentiation studies, use of *Moluccella laevis* lectin as marker, G553
  - distribution of prolactin and growth hormone receptor transcripts and isoforms, G431
- intestinal
  - arginine transport by, changes with differentiation, G578
  - enterocyte differentiation, role of laminin and merosin, G857
  - phenylalanine-induced secretion in, role of calcium, G90
  - tight junction barrier function, enteropathogenic *E. coli* effects on, G374
  - tight junction permeability, effects of nitric oxide on, G361
  - vitamin A trafficking in, roles of cytoplasmic retinol binding proteins, G224
- pancreatic goblet, degranulation, neurohumoral control, G24
- small intestinal, glutamine effects on glucose oxidation, G879

**Epithelium**

- of small intestine, crypt-villus axis organization and stem cell hierarchy during development in mouse, G813

***Escherichia coli***

- enteropathogenic, effects on intestinal tight junction barrier function, G374
- enterotoxin effects on cGMP in Caco-2 cells, G361
- hepatic TNF- $\alpha$  expression from, effects of hypoxia-reoxygenation, G311

**Esophagogastric junction**

- mechanics of phrenic ampullary emptying, G320

**Esophagogastric reflux**

- aging effects on esophageal secondary peristalsis and sphincter pressures, G772
- objective criteria for defining transient lower esophageal sphincter relaxation, G128

**Esophagus**

- aging effects on secondary peristalsis and sphincter pressures, G772
- circular muscle, transient outward current, G979
- circular smooth muscle, nonadrenergic noncholinergic inhibitory junction potentials, roles of NO and K<sup>+</sup> channels, G831
- lower sphincter
  - hemoglobin effects on, G443
  - nitric oxide synthase immunoreactive nerves, G59
  - serotonin effects on, receptor subtypes involved, G1004
  - transient relaxation, objective criteria for defining, G128
- nitric oxide pathway and neuronal coexistence with VIP, G59
- oropharyngeal swallowing in cat, video-fluoroscopy and electromyography, G232
- peristalsis, hemoglobin effects on, G443

- upper sphincter, function during swallowing, aging effects on, G389

**Estrogens**

- effects on gastric emptying and gastrointestinal transit, G171
- effects on liver mitochondria: role in acute fatty liver of pregnancy, G107
- estradiol effects on gastric emptying and gastrointestinal transit, G171

**Ethanol**

- gastric damage from, protective effect of raphe pallidus kainic acid, role of medullary thyrotropin-releasing hormone, G548

**Extracellular signal-regulated kinase kinase**

- activation by pancreatic acinar cholecystokinin, G1060

**F****Fasting**

- effects on duodenal chyme transport patterns, G700
- effects on insulin-like growth factor system in small bowel, G631

**Fat**

- dietary, effects on jejunal lactase gene expression, G1066

**Fatty acids**

- oxidation in mitochondria, estrogen and progesterone effects on, G107
- polyunsaturated unesterified, uptake and interconversion by GI tract, G732
- in structured triglycerides, effects of type and position on absorption and lymphatic transport, G568

**Fatty liver, acute**

- of pregnancy, role of sex hormone effects on liver mitochondria, G107

**Fetus**

- bile acid transport across trophoblast to maternal blood, G685

**Fibroblast growth factor**

- basic, effects on indomethacin-delayed gastric ulcer healing, G276

**Fibroblasts**

- of skin, hormone-induced cAMP production, bile acid effects on, G908

**Food intake***see also* **Satiety**

- effects on colon motility in unrestrained ambulatory dogs, G650
- effects on proximal colonic tone, G95

**Food protein-induced gastrointestinal allergy**

- effects on colon longitudinal muscle contractility, G764

**Forearm vascular resistance**

- in cirrhotics, response to methacholine chloride, nitroprusside, and phenylephrine, G459

**Fos (protooncogene product)**

- pancreatic intranuclear immunoreactivity after veratridine or serotonin, G339

**Free radicals, *see* Reactive oxygen species****G****G proteins**

- G<sub>s</sub>, role in bile acid suppression of hepatocellular cAMP synthesis, G300

- pertussis toxin-sensitive, effects on phenylalanine-induced cholecystokinin secretion, G90

- and prostaglandin E<sub>2</sub> receptors in colonic crypt cells, G270

**GABA, *see*  $\gamma$ -Aminobutyric acid, receptors****Galactosamine**

- liver injury from, role of endothelin-1, G997

**Galactosylated proteins**

- recognition by liver, G849

**Gastric, *see* Stomach****Gastrin**

- gastrin-cholecystokinin-B receptors on J.RT3-T3.5 Jurkat cells, G522
- need for cAMP in eliciting parietal cell aminopyrine accumulation, G82
- rat-human chimeric transgene, antral G cell-specific expression, G1025
- role in bombesin-stimulated gastric acid secretion, G54
- role in uremia-induced gastric mucosal hypertrophy, G586

**Gastroesophageal, *see* Esophagogastric****Gastrointestinal motility**

- colonic
  - contractile patterns and relation to propulsion, G530
  - in unrestrained ambulatory dogs, 24-hour study, G650
- duodenal pH effects on interdigestive migrating myoelectric complex, G146
- sex hormone effects on, G171

**Gastrointestinal tract**

- distribution of prolactin and growth hormone receptor transcripts and isoforms, G431

**Gene transfer**

- adenovirus- and plasmid-mediated, to salivary submandibular gland, G1074

**Genes**

- rat gastrin promoter-human gastrin reporter chimeric transgene, antral G cell-specific expression, G1025

**Gestation***see also* **Fetus**

- acute fatty liver, estrogen and progesterone effects on liver mitochondria, G107

**Giant migrating contractions**

- colonic
  - relation to propulsion, G530
  - in unrestrained ambulatory dogs, 24-hour study, G650

**Glucagon**

- hepatocellular cAMP synthesis from, mechanism of bile acid suppression, G300

**Glucosylase**

- ontogenic intestinal changes, normal vs. glucocorticoid-accelerated, 5-bromo-2'-deoxyuridine effects, G139

**Glucocorticoids**

- precocious intestinal maturation from, normal or deviant pathway?, G139

**Glucose**

- cotransport with Na<sup>+</sup>, in cystic fibrosis jejunum, G505
- hepatocyte output, nitric oxide effects on, G183

oxidation in small intestine, effects of glutamine, G879  
transport in enterocyte brush-border membrane vesicles, polyamine effects on, G416

### Glutamine

effects on glucose oxidation in small intestine, G879

### Glutathione

pancreatic decrease, role in pancreatitis pathophysiology, G592

### Glyceraldehyde-3-phosphate dehydrogenase

hepatocellular, nitric oxide effects on, G183

### Glycoconjugates

recognition by *Moluccella laevis* lectin, use as marker in cell differentiation studies, G553

### Goblet cells

pancreatic, degranulation, neurohumoral control, G24

### gp300 sulfated glycoprotein

increased acinar expression and altered acinar morphology in CFTR(-/-) mice, G717

### Granulocytes

gastric mucosal infiltration, after chronic aspirin doses, G134

### Gravity

effects on gastric emptying  
of nonnutrient liquid, G868  
of oil and aqueous meal components, in pancreatic insufficiency, G925

### Growth factors, see specific factor

### Growth hormone receptor

transcripts and isoforms in gastrointestinal cell lines, G431  
GHRd3, distribution in gastrointestinal cell lines, G431

### Growth, see Maturation

### Guanine nucleotide-binding proteins, see G proteins

### Guanosine 3',5'-cyclic monophosphate

in Caco-2 cells, effects of sodium nitroprusside or *E. coli* enterotoxin, G361  
formation in pancreatic acinar cells, Ca<sup>2+</sup> effects on, G900

## H

### H<sup>+</sup>-ATPase, see Proton-ATPase

### Heart

β-adrenergic receptors, effects of portal vein stenosis on, G410

### Heart rate

effects of GABA<sub>A</sub> receptor blockade in hypothalamic dorsomedial nucleus, G514

### Heart ventricles

left, portal vein stenosis, effects on papillary muscles, G410

### Hemochromatosis

hepatic fibrosis, and iron-induced lipocyte activation, G451

### Hemoglobin

human recombinant, esophageal effects and chest pain from therapeutic use as blood substitute, G443

### Hemorrhage

β-adrenergic receptor downregulation, G749

### Heparin

binding sites, and hepatocyte growth factor/scatter factor bioavailability

### Hepatocyte growth factor/scatter factor

bioavailability and effects on liver growth, G380

### Hepatocytes

adenosine 3',5'-cyclic monophosphate synthesis, mechanism of bile acid suppression, G300  
basolateral dicarboxylate/cholate antiport system, G797  
basolateral sodium-taurocholate cotransport, effects of prolactin, G11  
bile acid-induced apoptosis, role of serine protease translocation to nucleus, G613  
glucose output and urea production, effects of nitric oxide on, G183  
indicator dilution curves, effects of intralobular zonal variation on rate constants, G189  
permeabilized, ryanodine-induced Ca<sup>2+</sup> release, G1017

### Hiatal hernia

and mechanics of phrenic ampullary emptying, G320

### Histamine

effects on pancreatic goblet cell degranulation, G24  
and ileal circular muscle response to substance P, G161

### Histamine H<sub>2</sub> receptor

colonic secretions from, role of VIP-ergic and cholinergic pathways, G465

### Hydrogen-potassium-ATPase

and omeprazole effects on parietal cells (letter to the editor), G387

### 3-Hydroxybutyrate

and ketone body ratio, use in quantifying oxidative liver injury, G471

### 5-Hydroxyindalpine

effects on veratridine-evoked pancreatic amylase secretion and *c-fos* expression, G339

### 5-Hydroxytryptamine, see Serotonin

### Hypersensitivity reactions

food protein-induced GI allergy, effects on colon longitudinal muscle contractility, G764

### Hypertension, portal, see Portal hypertension

### Hypophosphatemia

effects on Na<sup>+</sup>-P<sub>i</sub> transporter adaptation to phosphate deficiency, G917

### Hypotension

in septic shock, from endotoxin-induced vascular hyporeactivity, role of nitric oxide, G177

### Hypothalamic-pituitary-adrenal axis

cholestatic suppression of hypothalamic PGE<sub>2</sub> and effects on IL-1-induced ACTH release, G404

### Hypothalamus

prostaglandin production, suppression by cholestasis and effects on IL-1-induced ACTH release, G404

### Hypoxia

hepatic, effects on *E. coli*-induced TNF-α expression, G311

## I

### Ileitis

changes in enteric neural regulation of smooth muscle, G823

### Ileum

circular muscle, contraction-inducing tachykinin receptors in dog, G161  
intrinsic factor degradation by cathepsin L, G33  
output to colon, effects on proximal colonic tone, G95  
peptide YY trophic actions, G71

### Indomethacin

delayed gastric ulcer healing from, effects of omeprazole and basic fibroblast growth factor on healing, G276  
and effects of hepatic hypoxia on *E. coli*-induced TNF-α expression, G311  
gastric mucosal effects after chronic aspirin doses, G134

### Inflammation

gastric mucosal adaptation to chronic aspirin doses, G134  
indexes of, during colitis, relation to electrolyte transport changes, G622

### Inflammatory bowel disease

see also Colitis  
changes in enteric neural regulation of smooth muscle, G823

### Inhibitory junction potentials

nonadrenergic noncholinergic, roles of NO and K<sup>+</sup> channels, G831

### Inositol 1,4,5-trisphosphate

and gastrin-cholecystokinin-B receptors on J.RT3-T3.5 Jurkat cells, G522

### Insulin-like growth factor binding protein 3

expression in small bowel, effects of fasting and refeeding on, G631

### Insulin-like growth factor-I

actions in small bowel, effects of fasting and refeeding on, G631

### Insulin-like growth factor receptors

type 1, expression in small bowel, effects of fasting and refeeding on, G631

### Interdigestive migrating myoelectric complex

regulatory role of duodenal pH, G146

### Interferons

IFN-γ, role in PMN-mediated GI mucosal injury, G843

### Interleukins

IL-1, adrenocorticotrophic hormone release, effects of cholestasis and role of impaired hypothalamic PGE<sub>2</sub> release, G404

IL-2, and gastrin-cholecystokinin-B receptors on J.RT3-T3.5 Jurkat cells, G522

### Intestinal acid

inhibition of gastric acid by, role of vagal and splanchnic afferents, G286

### Intestine

see also Colon; Colitis; Rectum

absorption of structured triglycerides, effects of fatty acid type and structural position, G568

anaphylaxis, food protein-induced, effects on colon longitudinal muscle contractility, G764

brush-border membrane, inner and outer leaflets, differential sensitivity to oxidative damage, G260

**Intestine (continued)**

- epithelial cell differentiation studies, use of *Moluccella laevis* lectin as marker, G553
- epithelial tight junctions
  - barrier function, enteropathogenic *E. coli* effects on, G374
  - permeability and ATP, nitric oxide effects on, in Caco-2 cells, G361
- glucocorticoid-accelerated maturation, normal or deviant pathway?, G139
- ischemia-reperfusion
  - phospholipase A<sub>2</sub> role in neutrophil priming and lung injury, G397
  - quantifying oxidative injury in liver, G471
- postnatal, vascular resistance, nitric oxide role in regulation, G949
- uptake and interconversion of plasma n-3 polyunsaturated fatty acids, G732

**Intestine, small**

- brush-border membranes
  - ecto-ATPase in, G663
  - glucose transport, in vesicles, polyamine effects on, G416
- crypt-villus axis organization and stem cell hierarchy during development in mouse, G813
- digestive functions, vagovagal reflex control (review), G1
- duodenum, chyme transport patterns during fasting and postprandial states, G700
- enterocytes
  - differentiation, role of laminin and merosin, G857
  - mucosal, respiration rates after graded ischemia, G116
- epithelial cells, glutamine effects on glucose oxidation, G879
- ileum, inflammatory changes in enteric neural regulation of smooth muscle, G823
- insulin-like growth factor system in, effects of fasting and refeeding on, G631
- jejunum
  - alanine absorption, effects of vagal capsaicin-sensitive primary afferent fibers, G695
  - ectopic pacemakers after transection, relation to transit, G959
  - ion transport defects in cystic fibrosis, G505
  - lactase gene expression, effects of dietary carbohydrate or fat, G1066
  - lactase processing from prolactase and postweaning decline, role of pancreatic proteases, G41
  - motility induced by GABA<sub>A</sub> receptor blockade in hypothalamic dorsomedial nucleus, G514
  - peptide YY trophic actions and ontogeny of gene expression, G71
  - role of nitric oxide in motor pattern regulation, G207
  - STC-1 cell line, phenylalanine-induced secretion in, role of calcium, G90
  - system  $\gamma^+$  transport of arginine by Caco-2 cells, changes with differentiation, G578

- vitamin A trafficking in, roles of cytoplasmic retinol binding proteins, G224

**Intrinsic factor**

- intracellular degradation by cathepsin L, G33

**Iron**

- chronic overload, hepatic fibrosis from, and iron-induced lipocyte activation, G451

**Ischemia**

- effects on cellular and mitochondrial respiration rates in small intestine enterocytes, G116

**Ischemia-reperfusion**

- hepatic
  - effects on pulmonary permeability, role of xanthine oxidase, G988
- microcirculatory changes from, role of reactive oxygen species, G47
- intestinal
  - phospholipase A<sub>2</sub> role in neutrophil priming and lung injury, G397
  - quantifying oxidative injury in liver, G471

**Its cells, see Lipocytes****J****Jejunum**

- ontogenic changes, normal vs. glucocorticoid-accelerated, 5-bromo-2'-deoxyuridine effects, G139

**K****Kainic acid**

- in raphe pallidus, gastroprotective effect, role of medullary thyrotropin-releasing hormone, G548

**Ketone body ratio**

- and 3-hydroxybutyrate, use in quantifying oxidative liver injury, G471

**Kidney**

- catecholamine production and metabolism, vs. mesenteric organs and liver, G641
- sodium-phosphate transporter, adaptation to phosphate deficiency, effects of hypophosphatemia, G917

**Kidney failure**

- chronic, gastric mucosal hypertrophy from, role of gastrin, G586

**Kupffer cells**

- uptake of oxidatively modified chylomicrons, G709

**L****Lactase**

- ontogenic intestinal changes, normal vs. glucocorticoid-accelerated, 5-bromo-2'-deoxyuridine effects, G139

**Lactase-phlorizin hydrolase**

- jejunal synthesis, effects of dietary carbohydrate or fat, G1066
- prolactase processing and postweaning decline, role of pancreatic proteases, G41

**Laminin**

- extracellular, role in enterocytic differentiation, G857

**Lectins**

- use as markers in cell differentiation studies, G553

**Leukocytes**

- injury from, quantifying oxidative injury in liver, G471

**Leukotrienes**

- B<sub>4</sub>, synthesis, during colitis, relation to electrolyte transport changes, G622

**Leupeptin**

- role in intrinsic factor degradation, G33

**Lipocytes**

- activation by chronic iron overload, G451

**Lipopolysaccharide, see Endotoxin****Liver**

- see also **Hepatocytes**
- $\beta$ -adrenergic receptors, downregulation after hemorrhagic shock, G749
- catecholamine production and metabolism, vs. mesenteric organs and kidney, G641
- cholestasis and opioid mRNA expression, G346
- E. coli*-induced TNF- $\alpha$  expression, effects of hypoxia-reoxygenation, G311
- in endotoxemic hyporeactivity to phenylephrine, role of nitric oxide, G177
- fibrosis and cirrhosis, from chronic iron overload, and iron-induced lipocyte activation, G451
- growth, induced by hepatocyte growth factor/scatter factor, G380
- indicator dilution curves, effects of intralobular zonal variation on rate constants, G189
- injury
  - from galactosamine and endotoxin, role of endothelin-1, G997
  - from portal vein-derived oxidants, quantifying, G471
- ischemia-reperfusion, effects on pulmonary permeability, role of xanthine oxidase, G988
- lovastatin effects on phospholipid metabolism in rat, G242
- lysosomal uptake and transport of organic cations, G480
- microsomes
  - pancreatic polypeptide receptors, solubilization and identification, G215
  - ryanodine-induced Ca<sup>2+</sup> release, G1017
- microvasculature, circulatory status and transport function, effects of reactive oxygen species, G47
- mitochondria, estrogen and progesterone effects on: role in acute fatty liver of pregnancy, G107
- organic anion uptake
  - basolateral dicarboxylate/cholate antiport system, G797
  - sodium-independent basolateral mechanism in skate, G18
- recognition of galactosylated proteins, G849
- regeneration
  - DNA synthesis, effects of bile acids and role of amidation, G1051
  - role of epidermal growth factor from salivary glands, G872
- uptake of oxidatively modified chylomicrons, G709

**Liver disease**

- cardiac dysfunction from, cardiac  $\beta$ -adrenoceptors and portal vein stenosis, G410

- cholestatic  
bile acid-induced hepatocyte apoptosis  
in, role of serine protease translocation to nucleus, G613  
opioid mRNA expression, G346
- Lovastatin**  
effects on hepatic phospholipid metabolism in rat, G242
- Lung**  
injury, from intestinal ischemia-reperfusion, role of phospholipase A<sub>2</sub> and effects of quinacrine, G397  
permeability, effects of hepatic ischemia-reperfusion, role of xanthine oxidase, G988
- Lymphocytes, see also T cells**  
intestinal intraepithelial  
prolactin and prolactin receptor transcript expression in, G431
- Lysosomal proteases**  
cathepsin L  
role in intrinsic factor degradation, G33
- Lysosomes**  
hepatic  
uptake and transport of organic cations, G480
- M**
- Mast cells**  
gastric mucosal  
ontogeny of degranulation and relation to mucosal permeability, G121  
and ileal circular muscle response to substance P, G161
- Maturation**  
intestinal  
glucocorticoid-accelerated: normal or deviant pathway?, G139  
peptide YY trophic actions and ontogeny of gene expression, G71  
ontogeny of gastric mast cell degranulation and relation to mucosal permeability, G121  
small intestine crypt-villus axis organization and stem cell hierarchy during development in mouse, G813
- Membrane transport, see Transport**
- Membranes**  
basolateral plasma, in hepatocytes, prolactin effects on sodium-taurocholate cotransport, G11  
brush-border  
intestinal, differential sensitivity of inner and outer leaflets to oxidative damage, G260  
in small intestine, ecto-ATPase in, G663  
vesicular transport of glucose in enterocytes, polyamine effects on, G416
- Merosin**  
role in enterocytic differentiation, G857
- Mesenteric organs**  
catecholamine production and metabolism, vs. liver and kidney, G641
- Met-enkephalin**  
production in cholestatic liver, G346
- Methodologies**  
[D-Tyr-Gly]A-71378, highly selective cholecystokinin A receptor ligand, G605  
electrogastrography, relation to gastric and pyloric motor activity, G424
- hepatic indicator dilution curves, effects of intralobular zonal variation on rate constants, G189  
for cell differentiation studies, *Moluccella laevis* lectin as marker, G553  
for gene transfer, adenovirus and plasmids as vectors, G1074  
for increasing hepatocyte growth factor/scatter factor plasma levels on intraperitoneal infusion, G380  
for long-term study of colonic motility in unrestrained ambulatory dogs, G650  
for quantifying oxidative injury in liver, G471  
for solubilizing hepatic microsomal pancreatic polypeptide receptors, G215  
for studying gastrointestinal bolus transport, multiple intraluminal impedance measurements, G700
- Microfilaments**  
in pancreatic acinar cells, effects of supramaximal secretagogue stimulation, G328
- Microtubules**  
in pancreatic acinar cells, effects of supramaximal secretagogue stimulation, G328
- Microvasculature**  
gastric, angiogenesis from basic fibroblast growth factor, timing of ulcer healing effects, G276  
hepatic  
circulatory status and transport function, effects of reactive oxygen species, G47  
vasoconstriction from galactosamine and endotoxin, role of endothelin-1, G997
- Migrating myoelectric (motor, motility) complexes**  
colonic  
in unrestrained ambulatory dogs, 24-hour study, G650  
relation to propulsion, G530  
conversion to postprandial electrical pattern, role of NO, G207  
duodenal, during chyme transport, G700  
interdigestive, regulatory role of duodenal pH, G146
- Mitochondria**  
hepatic, estrogen and progesterone effects on: role in acute fatty liver of pregnancy, G107  
in small intestine enterocytes, respiration rates after graded ischemia, G116
- Mitogen-activated protein kinase kinase**  
activation by pancreatic acinar cholecystokinin, G1060
- MK-329 (cholecystokinin antagonist)**  
effects on volume and rhythm of pancreatic enzyme secretions, G251
- Models**  
for gastrointestinal ion transport in cystic fibrosis, CF mice with disrupted CFTR gene, G505  
for studying arginine transport in epithelial cells, system y<sup>+</sup> regulation in differentiating Caco-2 cells, G578
- Moluccella laevis lectin**  
use as marker in cell differentiation studies, G553
- N<sup>G</sup>-Monomethyl-L-arginine**  
effects on endotoxin-induced vascular hyporeactivity to phenylephrine, G177  
effects on nitric oxide suppression of hepatocyte glucose and urea production, G183
- Morphine**  
effects on saline-induced proximal colonic tone, G95
- Morphogenesis**  
small intestine, crypt-villus axis organization and stem cell hierarchy in mouse, G813
- Motilin**  
plasma levels and duodenal pH effects on interdigestive migrating myoelectric complex, G146
- Motion sickness**  
gastric slow wave dysrhythmia from, role of cholinergic and  $\alpha$ -adrenergic pathways, G539
- Motoneurons**  
of vagal dorsal motor nucleus, effects of serotonin alone and with thyrotropin-releasing hormone, G292
- Mouth**  
swallowing in cat, videofluoroscopy and electromyography, G232
- Mucin**  
gastric, secretion, prolactin effects on, G431
- Mucus**  
pancreatic secretion, and regulation of goblet cell degranulation, G24
- Multispecific organic anion transporter**  
and bile acid facilitation of protoporphyrin excretion, G754
- Murocholic acid**  
effects on hepatocellular cAMP formation, G300
- Muscarinic cholinergic receptors**  
in regulation of pancreatic goblet cell degranulation, G24
- Muscarinic pathways**  
role in gastroprotective effect of raphe pallidus kainic acid, G548
- Muscarinic synapses**  
role in histamine H<sub>2</sub> receptor-induced colonic secretion, G465
- Muscle, smooth**  
colonic  
contractility, effects of food protein-induced GI allergy, G764  
tonic responses to eating, nutrients, and simulated diarrhea, G95  
esophageal  
nonadrenergic noncholinergic inhibitory junction potentials, roles of NO and K<sup>+</sup> channels, G831  
nonadrenergic, noncholinergic relaxation, roles of NO and VIP, G59  
transient lower sphincter relaxation, objective criteria for defining, G128  
transient outward current, G979  
esophagogastric, mechanics of phrenic ampullary emptying, G320  
gastric, somatostatin receptors, G739  
gastrointestinal  
colonic contractile patterns and relation to propulsion, G530  
nitric oxide effects on, and hemoglobin effects on esophagus, G443

**Muscle, smooth** (*continued*)

- role of nitric oxide in small intestine motor pattern regulation, G207
- ileal, inflammatory changes in enteric neural regulation, G823
- interdigestive migrating myoelectric complex, regulatory role of duodenal pH, G146
- intestinal, changes in colitis, benefits of nitric oxide inhibition, G673
- sex hormone effects on gastric emptying and gastrointestinal transit, G171
- tachykinin receptors as mediators of canine ileal motility, G161

**Myeloperoxidase**

- gastric mucosal, after chronic aspirin doses, G134

**Myenteric plexus**

- changes in colitis, benefits of nitric oxide inhibition, G673

**N****Naproxen**

- gastric mucosal effects, after chronic aspirin doses, G134

**Nasopharynx**

- closure during swallowing and belching, mechanism and timing, G1037

**Nausea**

- and gastric slow wave dysrhythmia, from motion sickness, role of cholinergic and  $\alpha$ -adrenergic pathways, G539

**Neonates, see Newborn****Nerve function**

- noradrenergic, changes in colitis, benefits of nitric oxide inhibition, G673

**Neural afferent fibers**

- vagal and splanchnic, role in enterogastric inhibition of gastric acid secretion, G286

**Neuroendocrine-immune axis**

- cholestatic suppression of hypothalamic PGE<sub>2</sub> and effects on IL-1-induced ACTH release, G404

**Neurokinins**

- neurokinin A, and tachykinin receptors as mediators of canine ileal motility, G161

**Neurons**

- nonadrenergic, noncholinergic, in esophagus, NO sites and colocalization with VIP, G59
- sensory, role in irritant-induced gastric fluid increase, G200

**Neurotransmission**

- nonadrenergic noncholinergic, in esophageal smooth muscle, roles of NO and K<sup>+</sup> channels, G831

**Neutrophils**

- gastrointestinal mucosal cytotoxicity from, role of interferon- $\gamma$ , G843
- priming, after intestinal ischemia-reperfusion, role of phospholipase A<sub>2</sub> and effects of quinacrine, G397

**Newborn**

- glucocorticoid-accelerated intestinal maturation, normal or deviant pathway?, G139
- intestinal vascular resistance, nitric oxide role in regulation, G949

- ontogeny of gastric mast cell degranulation and relation to mucosal permeability, G121

**Nicotine**

- effects on gastric ulcer margin hyperemia, G153

**Nicotinic synapses**

- role in histamine H<sub>2</sub> receptor-induced colonic secretion, G465

**Nitrate ion**

- serum levels in cirrhotic patients, G459

**Nitric oxide**

- and calcium effects on cGMP formation in pancreatic acinar cells, G900
- effects on hepatocyte glucose output and urea production, G183
- effects on tight junction permeability and ATP in Caco-2 cells, G361
- esophageal pathway and relationship to VIP, G59
- gastric release, from central vagal activation by thyrotropin-releasing hormone, G895
- and inflammatory changes in enteric neural regulation of smooth muscle, G823
- interaction with calcitonin gene-related peptide in sensory neuron-induced gastric vasodilation, G791
- role in colitis inflammatory changes, G673
- role in endotoxemic vascular hyporeactivity to phenylephrine, G177
- role in esophageal nonadrenergic noncholinergic inhibitory junction potentials, G831
- role in gastrointestinal smooth muscle function, and hemoglobin effects on esophagus, G443
- role in peripheral vasodilation of portal hypertension, G459
- role in regulation of small intestinal motor patterns, G207
- role in regulation of vascular resistance in postnatal intestine, G949
- role in restitution of injured gastric mucosa, G933

**Nitric oxide synthase**

- esophageal sites and colocalization with VIP, G59

**Nitrite ion**

- serum levels in cirrhotic patients, G459

**N-Nitro-L-arginine methyl ester**

- beneficial effects in colitis, G673

**S-Nitroso-N-acetylpenicillamine**

- effects on permeability and ATP in Caco-2 cells, G361

**S-Nitroso-N-acetyl-DL-penicillamine**

- effects on endotoxin-induced vascular hyporeactivity to phenylephrine, G177

**Nonadrenergic noncholinergic neurotransmission**

- in esophageal smooth muscle, roles of NO and K<sup>+</sup> channels, G831

**Nonsteroidal anti-inflammatory drugs**

- effects on chief cell pepsinogen secretion and calcium mobilization, G968
- gastric mucosal adaptation to, G134

**Norepinephrine**

- production and metabolism in liver, mesenteric organs, and kidney, G641

**O****Octapeptide**

- effects on pancreatic goblet cell degranulation, G24

**Oil**

- dietary, from corn, linseed, or fish, effects on clearance of oxidatively modified chylomicrons, G709

**Omeprazole**

- effects on indomethacin-delayed gastric ulcer healing, G276
- effects on parietal cells (letter to the editor), G387

**Ontogeny, see Maturation****Opioids**

- mRNA expression in cholestatic liver, G346

**Oral cavity**

- swallowing in cat, videofluoroscopy and electromyography, G232

**Oral-pharyngeal function**

- during swallowing, aging effects on, G389

**Organic anion transporter**

- multispecific, and bile acid facilitation of protoporphyrin excretion, G754

**Organic anions**

- hepatic uptake systems
- basolateral dicarboxylate/cholate antiport system, G797
- in skate, G18

**Organic cations**

- hepatic lysosomal uptake and transport and biliary excretion, G480

**Ornithine decarboxylase**

- gastric mucosal, after chronic aspirin doses, G134

**Oropharynx**

- swallowing in cat, videofluoroscopy and electromyography, G232

**Oxidation**

- of chylomicrons, effects on rate and site of clearance, G709

**Oxidative metabolism**

- in small intestine
- effects of glutamine, G879
- in enterocytes, effects of graded ischemia, G116

**Oxidative stress**

- see also* **Reactive oxygen species**
- differential sensitivity of membrane inner and outer leaflets, G260
- hepatic, quantifying liver injury from, G471
- role in pancreatitis pathophysiology, G592

**Oxygen radicals, see Reactive oxygen species****Oxygenation**

- posthypoxic, effects on *E. coli*-induced TNF- $\alpha$  expression, G311

**P****Pacemakers**

- jejunal ectopic, after transection, relation to transit, G959

**Pancreas**

- acinar cells
- desensitized, phosphoinositide synthesis in, G1043
- effects of supramaximal secretagogue stimulation on cytoskeleton, G328

- guanosine 3',5'-cyclic monophosphate formation,  $\text{Ca}^{2+}$  effects on, G900
- acini**
- cholecystokinin in, activation of mitogen-activated protein kinase kinase, G1060
  - increased expression of sulfated glycoprotein gp300 and altered morphology in CFTR(-/-) mice, G717
- digestive functions, vagovagal reflex control (review), G1
- exocrine secretions
- mechanisms regulating periodicity, G251
  - nerve-stimulated, effects of serotonin on, G339
- goblet cells, degranulation, neurohumoral control, G24
- insufficiency, gastric emptying of oil and aqueous meal components, effects of posture, G925
- luminal proteases, role in prolactase processing and in postweaning lactase decline, G41
- Pancreatic polypeptide**
- role in vagovagal reflex control of digestion, G1
- Pancreatic polypeptide receptors**
- on hepatic microsomes, solubilization and identification, G215
- Pancreatitis**
- and effects of supramaximal secretagogue stimulation on acinar cell cytoskeleton, G328
  - pathophysiology, ATP and glutathione decrease, role in zymogen activation, G592
- Parasympathetic nervous system**
- dorsal motor nucleus of vagus, integration of vagal and spinal input from GI tract, G780
- Parietal cells, see Stomach, parietal cells**
- Pentagastrin**
- gastric acid secretion from, inhibitory effect of intestinal acid, G286
- Pepsinogen**
- chief cell secretion, effects of nonsteroidal anti-inflammatory drugs, G968
- Peptide YY**
- intestinal trophic actions and ontogeny of gene expression, G71
  - microinjection into brain stem nuclei, induction of vagal stimulation of gastric acid secretion, G943
- Peristalsis**
- esophageal, secondary, aging effects on, G772
- Permeability**
- of gastric mucosa, and ontogeny of gastric mast cell degranulation, G121
  - pulmonary, effects of hepatic ischemia-reperfusion, role of xanthine oxidase, G988
  - of intestinal epithelial tight junctions
  - effects of enteropathogenic *E. coli*, G374
  - effects of nitric oxide on, G361
- Peroxidation**
- differential sensitivity of membrane inner and outer leaflets, G260
- Pertussis toxin**
- effects on phenylalanine-induced intestinal cholecystokinin secretion, G90
- pH**
- duodenal, effects on interdigestive migrating myoelectric complex, G146
  - interstitial, role in gastric mucosal oxyntic cell  $\text{pH}_i$ , G496
  - intracellular, in gastric mucosal oxyntic cell, role of interstitial buffering, G496

- pancreatic, role in prolactase processing and in postweaning lactase decline, G41
- Protein kinases**
- PKC, role in bile acid suppression of hepatocellular cAMP synthesis, G300
- Proteins**
- galactosylated, recognition by liver, G849
- Proteolysis**
- role in glycodeoxycholate-induced hepatocyte apoptosis, G613
- Proton-ATPase**
- role in hepatic lysosomal uptake and transport of organic cations, G480
- Proton extrusion**
- role in gastric mucosal oxyntic cell  $\text{pH}_i$ , G496

**Protooncogenes**

- c-fos*, pancreatic expression, effects of veratridine or serotonin, G339
- early response in liver regeneration, role of salivary glands, G872

**Protoporphyrin**

- excretion, facilitation by bile acids, G754

**Pylorus**

- motor activity, relation to surface electrogastrography, G424

**Q****Quinacrine**

- effects on neutrophil priming and lung injury after intestinal ischemia-reperfusion, G397

**R****Ras**

- activation by pancreatic acinar cholecystokinin, G1060

**Reactive oxygen species**

- and effects of hepatic hypoxia on *E. coli*-induced TNF- $\alpha$  expression, G311
- and effects of hepatic ischemia-reperfusion on pulmonary permeability, G988
- effects on hepatic microcirculatory status and transport function, G47
- role in PMN-mediated GI mucosal injury, G843

**Rectum**

- distension-induced Cl<sup>-</sup> secretion, vasoactive intestinal peptide as neurotransmitter, G725

**Refeeding**

- after fasting, effects on insulin-like growth factor system in small bowel, G631

**Resistance vessels**

- of forearm, in cirrhotics, response to methacholine, nitroprusside, and phenylephrine, G459

**Respiration**

- cellular and mitochondrial, in postischemic intestinal enterocytes, G116

**Reticuloendothelial system**

- uptake of oxidatively modified chylomicrons, G709

**Retinol binding proteins, cytoplasmic**

- CRBP and CRBP II, roles in intestinal vitamin A trafficking, G224

**Retinyl esters**

- synthesis and secretion in Caco-2 cells, and cytoplasmic retinol binding proteins, G224

**Rickets**

- hypophosphatemic vitamin D-resistant, and adaptation of renal Na<sup>+</sup>-P<sub>i</sub> transporter to phosphate deficiency, G917

**Ryanodine**

- effects on calcium release from hepatic microsomes and permeabilized hepatocytes, G1017

**S****Saline**

- effects on proximal colonic tone, G95

**Salivary duct**

- mandibular, forskolin- and norepinephrine-activated chloride currents, in mouse, G806

**Salivary glands**

- role in liver regeneration, G872
- submandibular, gene transfer via adenovirus and plasmids, G1074

**Satiety**

- cholecystokinin effects on vagal gastric mechanoreceptors, G355

**Scatter factor, see Hepatocyte growth factor/scatter factor****Secretagogues**

- calcium ion-dependent, need for cAMP in eliciting parietal cell aminopyrine accumulation, G82
- effects of supramaximal doses on pancreatic acinar cell cytoskeleton, G328

**Secretin**

- effects on gastric motility, role of vagal afferent pathway, G1012
- effects on pancreatic goblet cell degranulation, G24

**Sepsis**

- gram-negative, hepatic TNF- $\alpha$  expression from, effects of hypoxia-reoxygenation, G311
- endotoxin-induced vascular hyporeactivity, role of nitric oxide, G177
- hepatic dysfunction in, role of nitric oxide biosynthesis, G183

**Serine protease**

- translocation to nucleus, role in bile acid-induced hepatocyte apoptosis, G613

**Serotonergic neurons**

- enteropancreatic, role in pancreatic exocrine secretion, G339

**Serotonin**

- effects on lower esophageal sphincter, receptor subtypes involved, G1004
- effects on neurons of vagal dorsal motor nucleus, alone and with thyrotropin-releasing hormone, G292
- presynaptic inhibition of nerve-mediated pancreatic amylase secretion, G339

**Serotonin receptors**

- 5-HT<sub>3</sub>, role in serotonin effects on lower esophageal sphincter, G1004
- pancreatic, 5-HT<sub>1P</sub>, role in inhibition of pancreatic amylase secretion, G339

**Sex hormones**

- female
  - see also **Estrogen; Progesterone**
  - effects on gastric emptying and gastrointestinal transit, G171
  - effects on liver mitochondria: role in acute fatty liver of pregnancy, G107
- testosterone, effects on gastric emptying and gastrointestinal transit, G171

**Shock**

- hemorrhagic,  $\beta$ -adrenergic receptor downregulation, G749
- septic, see **Sepsis**

**Short-circuit current**

- colonic, dimaprit-evoked increases, role of VIP-ergic and cholinergic neurons, G465

- jejunal, in CF vs. normal mice, G505

**Signal transduction**

- see also **Calcium signaling**
- cardiac  $\beta$ -adrenergic, portal vein stenosis effects on, G410

**Signaling pathways**

- intracellular, in regulation of pancreatic goblet cell degranulation, G24

**Skin fibroblasts**

- hormone-induced cAMP production, bile acid effects on, G908

**Smoking, see Cigarette smoke****Sodium/hydrogen exchange**

- and oxyntic cell pH<sub>i</sub>, role of interstitial buffering, G496

**Sodium ion**

- cotransport with glucose, in cystic fibrosis jejunum, G505
- transport, in distal colon, time course of disruption and recovery during colitis, G622

**Sodium-phosphate transporter**

- renal, adaptation to phosphate deficiency, effects of hypophosphatemia, G917

**Sodium-taurocholate**

- cotransport in hepatocyte basolateral membrane, effects of prolactin, G11

**Somatostatin**

- gastric acid secretion regulatory mechanisms, G102

**Somatostatin receptors**

- SSTR<sub>3</sub>, on gastric smooth muscle, G739
- subtype involved in regulating gastric acid secretion, G102

**Spinal cord**

- input from GI tract, integration in dorsal motor nucleus of vagus, G780

**Splanchnic afferent fibers**

- capsaicin-sensitive, role in enterogastric inhibition of gastric acid secretion, G286

**Spleen**

- uptake of oxidatively modified chylomicrons, G709

**Staurosporine**

- effects on bile acid inhibition of hepatocellular cAMP formation, G300

**Stem cells**

- and formation of crypt-villus axis, in mouse small intestine, G813

**Stomach**

- acid secretion
  - bombesin-stimulated, inhibition by gastrin monoclonal antibody, G54
  - effects of platelet-activating factor, G889
  - enterogastric inhibition of, role of vagal and splanchnic afferents, G286
- omeprazole-suppressed, timing of ulcer healing effects, G276
- prolactin effects on, G431
- regulation by somatostatin receptor subtype 2, G102
- vagally stimulated, effects of peptide YY, microinjection into brain stem nuclei, G943
- antral G cells, specific expression of rat-human gastrin chimeric transgene, G1025
- antral pressures, relation to surface electrogastrography, G424
- chief cells
  - cholecystokinin subtypes on, G605
  - nonsteroidal anti-inflammatory drug effects on pepsinogen and calcium, G968
- digestive functions, vagovagal reflex control (review), G1
- emptying
  - duodenal chyme transport patterns during fasting and postprandial states, G700

- of nonnutritive liquid, effects of posture and gravity, G868  
 of oil and aqueous meal components, effects of posture and pancreatic insufficiency, G925  
 sex hormone effects on, G171
- gastric ulcer**  
 adverse effects of smoking, role of tobacco smoke attenuation of margin hyperemia, G153  
 effects of indomethacin, omeprazole, and basic fibroblast growth factor on healing, G276  
 interdigestive migrating myoelectric complex, regulatory role of duodenal pH, G146  
 mechanics of phrenic ampullary emptying, G320  
 motility, secretin effects on, role of vagal afferent pathway, G1012
- mucosa**  
 adaptation to chronic aspirin doses, G134  
 restitution after injury, role of NO, G933  
 role of gastric fluid increase in adaptive cytoprotection from mild irritants, G200  
 uremia-induced hypertrophy, role of gastrin, G586  
 mucosal mast cells, ontogeny of degranulation and relation to mucosal permeability, G121  
 nitric oxide release, from central vagal activation by thyrotropin-releasing hormone, G895  
 oxyntic cell, intracellular pH, role of interstitial buffering, G496
- parietal cells**  
 aminopyrine accumulation, role of cAMP in gastrin and carbachol actions, G82  
 omeprazole-induced changes (letter to the editor), G387  
 protective effect of raphe pallidus kainic acid, role of medullary thyrotropin-releasing hormone, G548  
 slow wave dysrhythmias, from motion sickness, role of cholinergic and  $\alpha$ -adrenergic pathways, G539  
 submucosal arterioles, sensory neuron-induced vasodilation, roles of NO and calcitonin gene-related peptide, G791  
 surface cell cytotoxicity, neutrophil-mediated, role of interferon- $\gamma$ , G843  
 uptake and interconversion of plasma n-3 polyunsaturated fatty acids, G732  
 vagal gastric mechanoreceptors, effect of cholecystokinin on, G355
- Stress**  
*see also* **Oxidative stress**  
 emotional, intestinal motility from GABA<sub>A</sub> receptor blockade in hypothalamic dorsomedial nucleus, G514
- Substance P**  
 and tachykinin receptors as mediators of canine ileal motility, G161
- Sucrase**  
 ontogenic intestinal changes, normal vs. glucocorticoid-accelerated, 5-bromo-2'-deoxyuridine effects, G139
- Sulfobromophthalein**, *see* **Bromosulfophthalein**
- Superoxide dismutase**  
 effects on oxidase-induced hepatic microcirculatory changes, G47  
 galactosylated, recognition by liver, G849
- Swallowing**  
 aging effects on oral-pharyngeal and upper esophageal sphincter function, G389  
 mechanics of phrenic ampullary emptying, G320  
 nasopharyngeal closure, mechanism and timing, G1037  
 oropharyngeal, in cat, videofluoroscopy and electromyography, G232  
 relation to transient lower esophageal sphincter relaxation, G128
- System  $\gamma^+$**   
 arginine transport capacity, regulation in differentiating Caco-2 cells, G578
- T**
- T cells**  
 gastrin-cholecystokinin-B receptors on J.RT3-T3.5 Jurkat cells, G522
- T84 cells**, *see* **Epithelial cells, intestinal**
- Tachykinin receptors**  
 NK<sub>1</sub> and NK<sub>2</sub>, as mediators of canine ileal motility, G161
- Tachykinins**  
 and inflammatory changes in enteric neural regulation of smooth muscle, G823
- Taurocholate**  
 cotransport with sodium in hepatocyte basolateral membrane, effects of prolactin, G11  
 sodium-independent hepatic uptake in skate, G18
- Taurocholic acids**  
 effects on hepatocellular cAMP formation, G300
- Testosterone**  
 effects on gastric emptying and gastrointestinal transit, G171
- Tetraethylammonium**  
 hepatic lysosomal uptake and transport, G480
- Tetrodotoxin**  
 effects on veratridine-evoked pancreatic amylase secretion and *c-fos* expression, G339
- $\beta$ -Thalassemia**  
 hepatic fibrosis in, and iron-induced lipocyte activation, G451
- Thyrotropin-releasing hormone**  
 central vagal activation by TRH analogue, effects on gastric NO, G895  
 gastric acid secretion from, inhibitory effect of intestinal acid, G286  
 medullary, role in gastroprotective effect of raphe pallidus kainic acid, G548  
 and peptide YY effects on gastric acid secretion, G943  
 plus serotonin, effects on neurons of vagal dorsal motor nucleus, G292  
 role in vagovagal reflex control of digestion, G1
- Tight junctions**  
 intestinal epithelial effects of enteropathogenic *E. coli*, G374  
 effects of nitric oxide on, G361
- Tobacco**, *see* **Cigarette smoke**
- Tone**  
 colonic, responses to eating, nutrients, and simulated diarrhea, G95
- Transepithelial electrical resistance**  
 in T84 cells, effects of enteropathogenic *E. coli*, G374
- Transport**  
*see also specific substance*  
 basolateral, sodium-independent organic anion uptake in skate liver, G18  
 hepatic lysosomal uptake and transport of organic cations, G480  
 of organic anions, hepatocyte basolateral dicarboxylate/cholate antiport system, G797  
 through jejunum, ectopic pacemakers after transection, relation to transit, G959  
 vesicular, of glucose, in enterocyte brush-border membrane vesicles, polyamine effects on, G416
- Trehalase**  
 ontogenic intestinal changes, normal vs. glucocorticoid-accelerated, 5-bromo-2'-deoxyuridine effects, G139
- Tricarboxylic acid cycle**  
 and estrogen and progesterone effects on liver mitochondria, G107  
 in small intestine, effects of glutamine, G879
- Triglycerides**  
 structured, effects of fatty acid type and position on absorption and lymphatic transport, G568
- Trophoblast**  
 bile acid transport from fetus to maternal blood, G685
- Trypsin**  
 activation in pancreatitis, role of ATP and glutathione decrease, G592
- $\beta$ -Tubulin**  
 in pancreatic acinar cells, effects of supramaximal secretagogue stimulation, G328
- Tumor necrosis factor- $\alpha$**   
 hepatic, *E. coli*-induced, effects of hypoxia-reoxygenation, G311  
 and vagovagal reflex control of digestion, G1
- U**
- Umbilical vein**  
 endothelial cells, hormone-induced cAMP production, bile acid effects on, G908
- Urea**  
 hepatocyte production, nitric oxide effects on, G183
- Uremia**, *see* **Kidney failure**
- V**
- Vagal afferent fibers**  
 capsaicin-sensitive, role in enterogastric inhibition of gastric acid secretion, G286  
 responses to gastric distension and cholecystokinin, G355
- Vagal afferent pathway**  
 role in secretin effects on gastric motility, G1002

**Vagovagal reflexes**

and control of digestion (review), G1

**Vagus nerve***see also* **Brain, dorsal motor nucleus of vagus**

capsaicin-sensitive primary afferent fibers, role in regulation of jejunal alanine absorption, G695

central activation by thyrotropin-releasing hormone analogue, effects on gastric NO, G895

role in intestinal motility from GABA<sub>A</sub> receptor blockade in hypothalamic dorsomedial nucleus, G514**Vascular resistance**

in forearm, in cirrhotics, response to methacholine, nitroprusside, and phenylephrine, G459

in postnatal intestine, nitric oxide role in regulation, G949

**Vasoactive intestinal peptide**

effects on pancreatic goblet cell degranulation, G24

esophageal colocalization with nitric oxide synthase, G59

as neurotransmitter for distension-induced intestinal Cl<sup>-</sup> secretion**Vasoactive intestinal peptide receptors**

in regulation of pancreatic goblet cell degranulation, G24

**Vasoactive intestinal peptidergic pathways**role in histamine H<sub>2</sub> receptor-induced colonic secretion, G465**Vasoactive intestinal polypeptide**

dimaprit-evoked colonic release, G465

**Vasoconstriction**

hepatic, from galactosamine and endotoxin, role of endothelin-1, G997

**Vasodilation**

endothelium-dependent, in hepatic cirrhosis, G459

gastric, sensory neuron-induced, roles of NO and calcitonin gene-related peptide, G791

**Veratridine**effects on pancreatic amylase secretion and *c-fos* expression, G339**Vesicular transport**

of glucose, in enterocyte brush-border membrane vesicles, polyamine effects on, G416

sodium-taurocholate cotransport, in hepatocyte, effects of prolactin, G11

**Visceral sensory information**

integration in dorsal motor nucleus of vagus, G780

**Vitamin A**

intestinal trafficking, roles of cytoplasmic retinol binding proteins, G224

**X****Xanthine oxidase**and effects of hepatic hypoxia on *E. coli*-induced TNF- $\alpha$  expression, G311  
and hypoxanthine, effects on portal pressure and hepatic bromosulphophthalein uptake, G47

role in pulmonary permeability from hepatic ischemia-reperfusion, G988

**Z****Zymogens**

activation in pancreatitis, role of ATP and glutathione decrease, G592
